## Update of ENEOS Materials the Carbon Neutrality Plan

ENEOS Materials Corporation (Head Office: Minato-ku, Tokyo; President and Representative Director: Shiga Satoru) has updated its ENEOS Materials Carbon Neutrality Plan\*1.

In November 2023, ENEOS Materials announced its Carbon Neutrality Plan, which aims to achieve a carbon-neutral society in cooperation with the government and society.

Under the updated plan, in order to respond to an increasingly uncertain social environment, and taking into account changes in the business environment surrounding decarbonization since its formulation in fiscal year 2023, ENEOS Materials has reflected the societal scenarios established by the ENEOS Group. With regard to initiatives for reducing its greenhouse gas emissions, ENEOS Materials has aligned its reduction targets with Japan's NDC\*2 and will advance measures to reduce emissions in its manufacturing and business activities.

In addition, in order to contribute to the reduction of greenhouse gas emissions across society, and in response to social demands, ENEOS Materials will work on the development, manufacturing, and sale of bio-based materials, recycled materials, and environmentally friendly advanced materials.

ENEOS Materials will continue to advance ESG management that creates both social value and economic value and contributes to the sustainable development of society and the realization of a vibrant future.
