Notice of Price Revision for Latex Products

As you are already aware, the market environment surrounding the latex industry has become increasingly challenging. In response to these changing conditions, maintaining a stable business foundation to ensure continued stable production and supply has become an urgent priority for our company.

Rising labor costs and repair and maintenance expenses have significantly increased our manufacturing costs. In addition, prices of auxiliary raw materials used in production have also escalated. Although we have made every effort to absorb these cost increases through internal cost-saving measures, we have concluded that it is no longer possible to offset them solely through our own efforts.

Accordingly, we regret to inform you that, in light of these circumstances, we will implement a price revision as outlined below.

1. Applicable Products: All latex products
2. Price Increase: JPY 28 or more per dry kilogram
3. Effective Date: Shipments delivered on or after April 1, 2026

We would appreciate your understanding and cooperation for our stable supply.
