

Polybutadiene Rubber/BR

With the properties of high abrasion resistance, good dynamic performance, low temperature vulcanization, high tensile strength and good resilience, which are notably not common in regular type use in golf balls because of good resilience.

BR 01 Excellent processability especially BR only compound.
 BR T700 Narrow molecular weight distribution compared with BR01
 BR 730 High MV type of T700. Excellent abrasion resistance and rebound resilience.

Grade	Product Stain	Cis Content (%)	Mooney Viscosity $ML_{1+4}(100^{\circ}C)$	Specific Gravity	Application
BR 01	NS	95	45	0.90	Tires, belts, hoses, footwear, rubberized cloth, industrial goods
BR T700	NS	95	42	0.90	Tires, belts
BR 730	NS	95	55	0.90	Tires, sports goods
